with Sebastian McIntyre

\* Early bird payment discount due  
by Friday 19 Sept 2008

The Tom Bass Sculpture Studio School is delighted to host a **workshop with exhibiting Sculpture by the Sea (SXS) artist Sebastian McIntyre**. McIntyre is an Australian born sculptor and landscape architect who lives and works in San Francisco, USA.

The focus of this workshop is to develop the artist's understanding of the relationship between art and landscape. Workshop participants will be guided through the process of designing and fabricating sculpture for clients (including presentation, budget and installation).

The workshop will also address the basic concepts of garden design and the relationship of scale, layout, perspective and materials.

Students will commence work on a maquette of a sculpture they have in mind or a sculpture garden layout/design.

McIntyre will advise on the technique and structure.
